

One brand, from the rank to the app to the billboard.

This guide is the single reference for WOW: logos, colour, type, voice and the web design system. Use it on the website, the WOW apps, social media, outdoor signs and partner material.

Who we are

WOW is South Africa's industry-owned digital operating system for the minibus taxi economy. It was built by the Eastern Cape Transport Tertiary Co-operative (ECTTC) and belongs to the people who operate it.

Crafted and **owned by the public transport industry. Ten focus areas. One wallet. One owner.**

~67 000

Taxi operators organised as one

~105 000

Minibus taxis on the network

~1/3

Of South Africa's national fleet

186 / 45

Primary and secondary co-operatives

120 000+

Scholars transported daily

~15 000

E-hailing vehicles in the co-op

Brand pillars

Every piece of WOW communication should prove at least one of these.

Owned from within

The platform, the wallet, the data and the revenue belong to the co-operative, not to a bank or an overseas app.

Organised as one

67 000 operators negotiating, paying and earning as a single fleet. Scale is our proof.

Built for the rank

Help happens where the industry works, on any phone, in the commuter's own language.

Proudly South African

Township-fluent and pan-South African. We are not a foreign brand passing through.

Siyabangena!

Siyabangena! — our rallying cry

It means “we’re getting in”, with confidence and intent. The root verb *-ngena*, to enter, is the everyday verb of taxi life: you *ngena* a taxi when you board. It reads instantly in isiZulu and isiXhosa.

Siyabangena always sits with the logo in its badge, and closes our biggest messages. It is never used as a polite greeting.

Say see-yah-bah-NGEH-nah

Means “We are entering / we’re getting in”

Write Siyabangena! — capital S, with the exclamation mark

Who we talk to

One brand serves many audiences. The tone changes a little for each, but the identity stays the same.

Taxi & fleet owners

Drivers

Commuters

Associations & co-ops

Parents & schools

Merchants & spazas

Government

Brands & sponsors

Investors

The WOW! logo

The wordmark is custom lettering and must never be retyped. Always use the master files. There are four parts to the logo family, and each has a job.

Primary lockup — WOW! + Siyabangena!

Use this first. Website headers and footers, campaign end frames, outdoor, and anything that introduces WOW to a new audience.

Wordmark

For small spaces and sub-brand lockups, or where Siyabangena is already said nearby.

W! mark

App icon, favicon, avatars.

Siyabangena badge

Sign-offs and stickers. Never replaces the logo.

Colourways

The logo appears in three colours: WOW Red, White and Tar. Use Red on light grounds, White on Red or dark grounds, and Tar on light focus-area accents.

Red on White — default

White on Red — hero moments

White on Tar

White on Oxblood — investor

The logo consists of the word "WOW!" in a bold, black, sans-serif font. The letters are thick and the exclamation mark is prominent.

Tar on Yellow — Fuel, Scholar

The logo consists of the word "WOW!" in a bold, white, sans-serif font. The letters are thick and the exclamation mark is prominent.

White on Blue — Mobile, WOW-Fi

Clear space & minimum size

- **x = the diameter of the dot in the "!"**. Keep at least 2x clear on every side of any logo. No text, image edges or other logos go in this space.
- Inside a Tab holder (see 05), padding can drop to 1x. The Tab counts as the logo's clear space.
- With partner logos, match the wordmark's cap height to the partner mark's visual height and separate them with 4x and a 1px Stone rule.

The primary lockup features the word "WOW!" in a large, bold, red, sans-serif font. Directly beneath it is a red rectangular tab with the word "Siyabangena!" in white, sans-serif font.

Primary lockup

160 px wide on screen · 40 mm in print

The wordmark version of the logo consists of the word "wow!" in a red, lowercase, sans-serif font. The letters are bold and the exclamation mark is included.

Wordmark

72 px wide · 18 mm

The W! mark version of the logo consists of the letters "w!" in a red, lowercase, sans-serif font. The letters are bold and the exclamation mark is included.

W! mark

24 px wide · 7 mm. Use it below wordmark minimum.

Focus-area lockups

WOW products use the wordmark with a Tab label. The label is Figtree Bold in capitals with 10% tracking. Its height is 60% of the wordmark height, and it is bottom-aligned with a gap of 0.25x. Never invent a new logo for a product.

wow! WALLET

wow! MOBILE

wow! SCHOLAR

wow! FI

wow! FUEL

wow! TRACK

wow! MERCHANTS

wow! GO

Label and wordmark colours must match: a Tar wordmark gets a Tar label, and a Red wordmark gets a Red Deep label. In running text, write the names as WOW Wallet, WOW Fuel, WOW Mobile, WOW-Track, WOW Scholar, WOW Merchants, WOW-Fi and WOW-Go. **LuckyX** is an endorsed brand with its own name: write "LuckyX by WOW".

Don't

These mistakes turned up on the mock-up website and in past social posts.

wow!

✗ Stretch, squash or skew it

wow!

✗ Rotate it

wow!

✗ Use colours outside Red, White, Tan

wow!

✗ Add shadows, glows or bevels

wow!

✗ Place Red on low-contrast grounds

Wow!

✗ Retype it in any font

wow!

Wealth on Wheels — Crafted and owned

✗ Crowd it with text

wow!

✗ Drop it on busy photos without a Tab

Red leads. Always.

WOW Red is the brand, and Tar and White do the hard work around it. Four focus-area accents help people find their way between products, but they never take over. Click any swatch to copy its HEX value.

What changed from 2025: the old Blue, Green, Yellow, Pink and Noir used the exact HEX values of a well-known tech company's palette (#5865F2, #57F287, #FEE75C, #EB459E, #23272A). They have been replaced with WOW's own colours, named after taxi-rank life. WOW Red stays the same as the logo files. Oxblood is the old Brown, renamed.

Balance

This is the typical mix across a campaign or a website. A single social post can go full Red.

Accessible pairings

WCAG 2.2 contrast ratios. White text on WOW Red only passes at large sizes (24 px regular, or 19 px bold and up). That’s why buttons and small red text use Red Deep.

SAMPLE	TEXT / GROUND	RATIO	USE FOR
	White on Tar	17.3 : 1	 Any text
	Tar on White	17.3 : 1	 Body copy default
	Tar on Marking Yellow	11.1 : 1	 Any text
	Tar on Rand Green	6.1 : 1	 Any text
	Ash on White	5.7 : 1	 Captions, secondary text
	White on Signal Blue	5.5 : 1	 Any text
	Tar on Siya Pink	5.4 : 1	 Any text
	White on Red Deep	5.3 : 1	 Buttons, small text on red
	Red Deep on White	5.3 : 1	 Links, eyebrows
	White on WOW Red	3.7 : 1	 Headlines, logo, 19 px bold+
	WOW Red on White	3.7 : 1	 Headlines and highlight words
	White on Rand Green	2.8 : 1	 Never
	White on Marking Yellow	1.6 : 1	 Never

Loud headlines, easy reading

There are two free Google Fonts families, so the website, Canva, Office, the app team and printers can all use the same files with no licence cost. They replace Halyard Display and Gibson from the 2025 guide.

Setting headlines

✓ DO

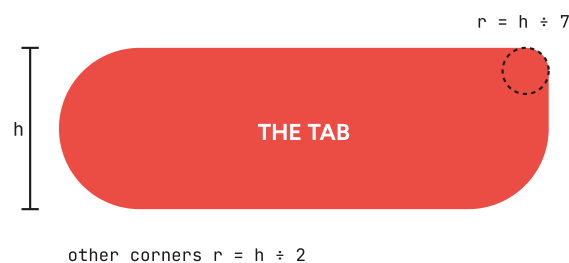

- Use sentence case, and end with a full stop for punch: "One wallet. One owner."
- Highlight one key word or phrase in WOW Red, like "Crafted and **owned**".
- Keep headlines to eight words or fewer, and break lines by meaning.
- Use all caps only for outdoor headlines of five words or fewer.

✗ DON'T

- Set a whole website headline in caps or mix bold and caps, as the mock-up does.
- Highlight more than one idea in red per headline.
- Use Archivo for body copy, or Figtree for display headlines.
- Track headlines out or add outlines, gradients or shadows.

The Tab & the Route

WOW uses two brand shapes. The Tab holds our voice: logos, labels and hashtags. The Route brings energy: a bold, road-like zigzag drawn from the corridors our taxis drive every day.

- **The Tab is for the brand speaking:** logo holders, product labels, hashtags, Siyabangena.
- **Full pills are for things you can press:** buttons and filters. Keeping them separate makes interactive elements easy to spot.
- The tight corner always sits top-right, pointing forward like the “!”.

The Route

One thick zigzag with rounded ends, bleeding off at least two edges. Use two colours from the palette: the Route in a brighter tone over a deeper ground, or Red over a light ground.

✓ DO

- Use one Route per layout, behind a headline or photo edge.
- Scale the stroke so it's roughly as thick as the wordmark's letter strokes.
- Animate it drawing on over 600–900 ms in motion work.

✗ DON'T

- Run it behind body text or the logo.
- Stack several Routes or cross it over itself.
- Add gradients, outlines or drop shadows.

Photo frames & characters

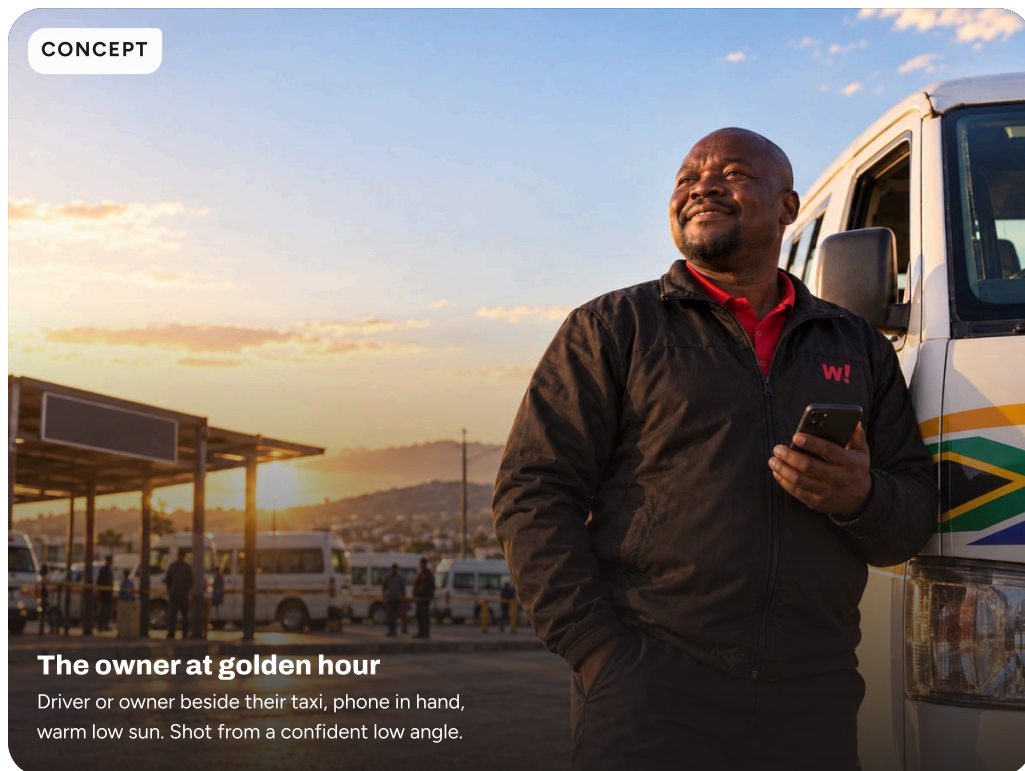

- Photos sit in 24 px rounded frames on screen, or 6 mm in print. Never use circles or hard corners.
- The hashtag Tab docks into the bottom-left corner, flush with the frame.

- **Character concepts** (the waving round “O” figures from the 2025 guide) are still in development. Use only approved master artwork, always in single-colour Red line style, and never alongside real people in the same frame.
- Images shown are AI-generated concepts. See chapter 06 for photography rules.

Real ranks. Real people.

Our photography shows the industry as it really is: proud, busy, sunlit and South African. People come first and vehicles second. The 2025 guide's stock images of international teenagers don't represent WOW and should be retired. The references below are AI-generated concepts. Use them to brief photographers, and replace them with commissioned shoots for public work.

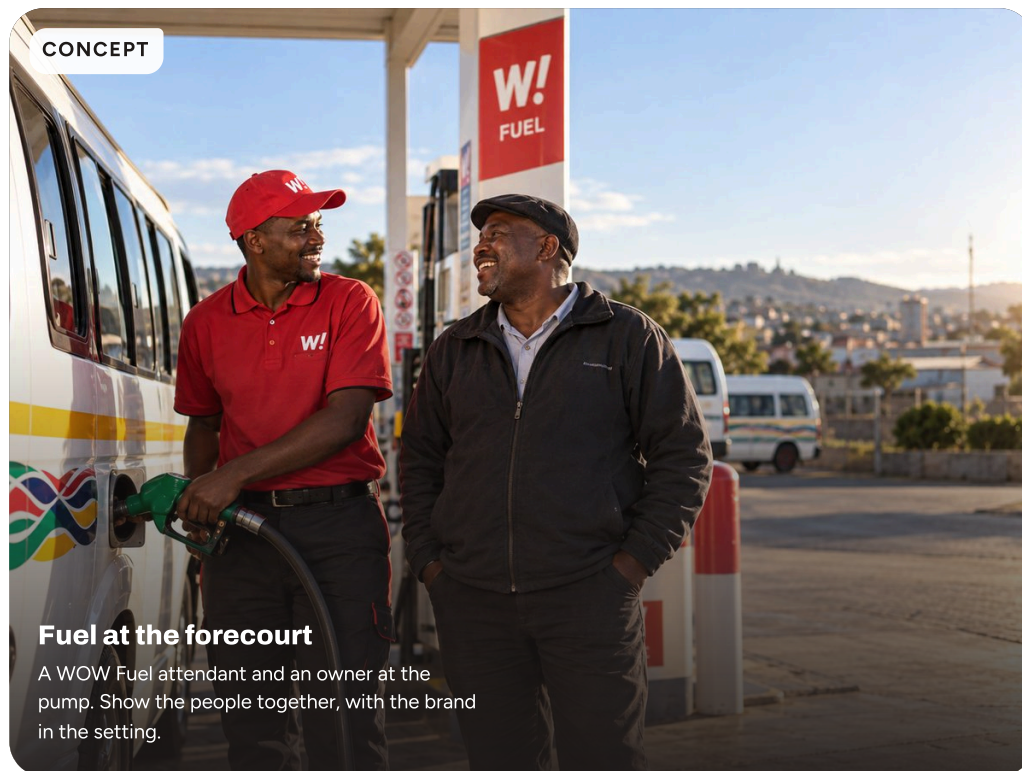

CONCEPT

The owner at golden hour

Driver or owner beside their taxi, phone in hand, warm low sun. Shot from a confident low angle.

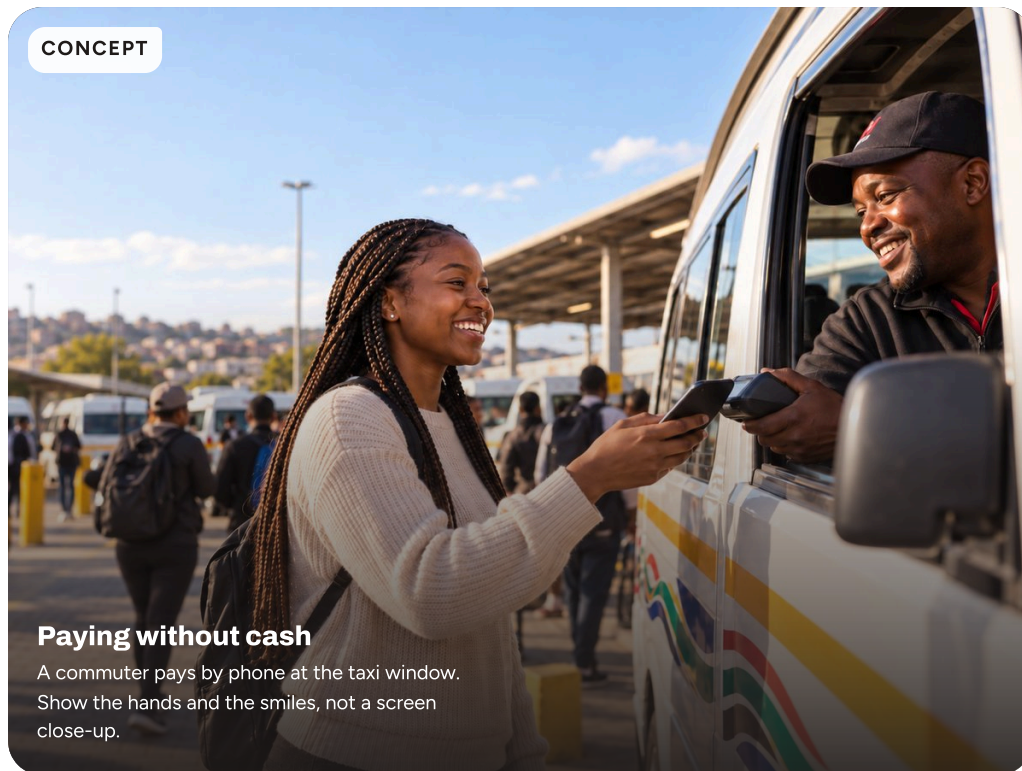

CONCEPT

Fuel at the forecourt

A WOW Fuel attendant and an owner at the pump. Show the people together, with the brand in the setting.

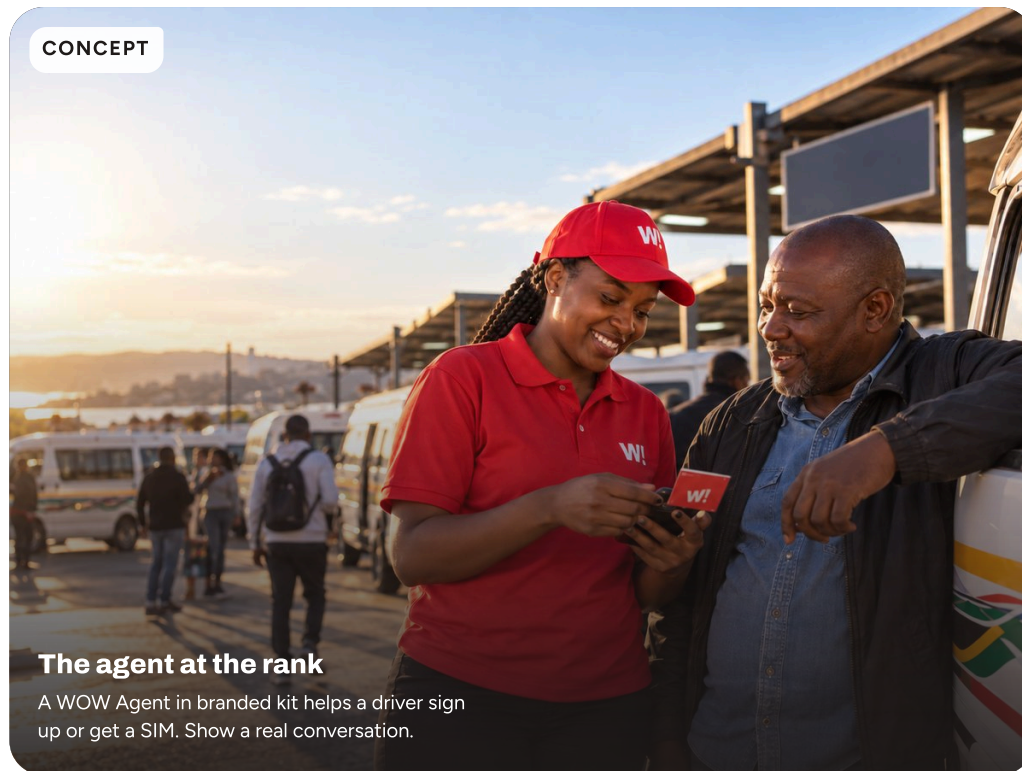

CONCEPT

Paying without cash

A commuter pays by phone at the taxi window.
Show the hands and the smiles, not a screen
close-up.

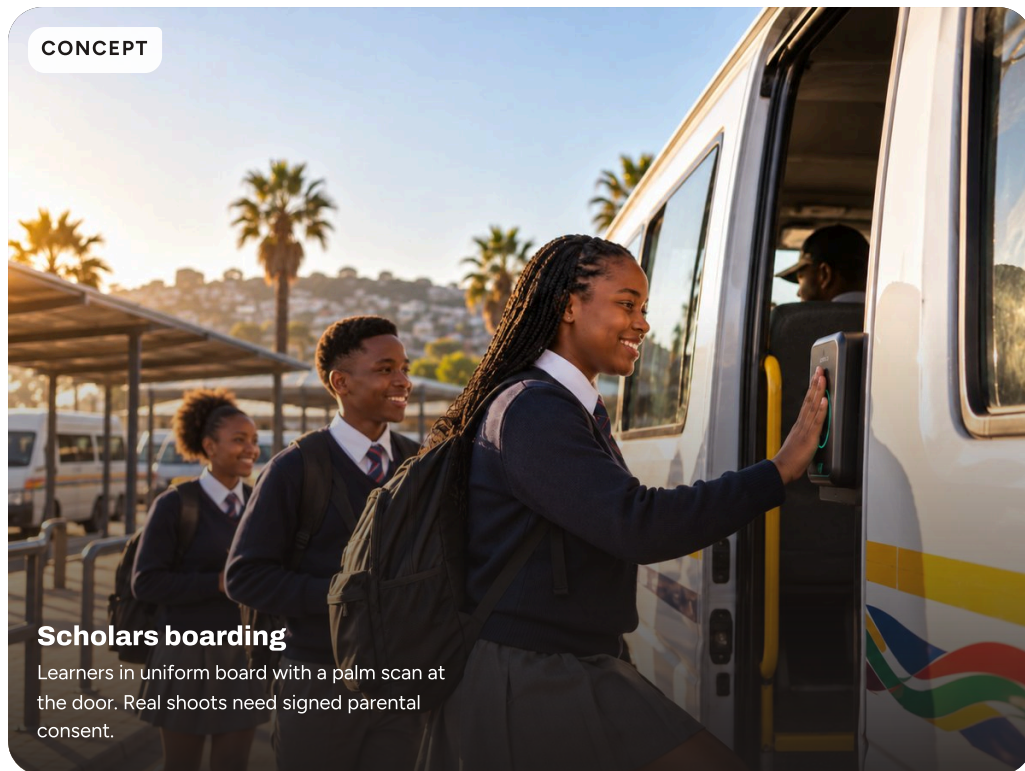

CONCEPT

The agent at the rank

A WOW Agent in branded kit helps a driver sign
up or get a SIM. Show a real conversation.

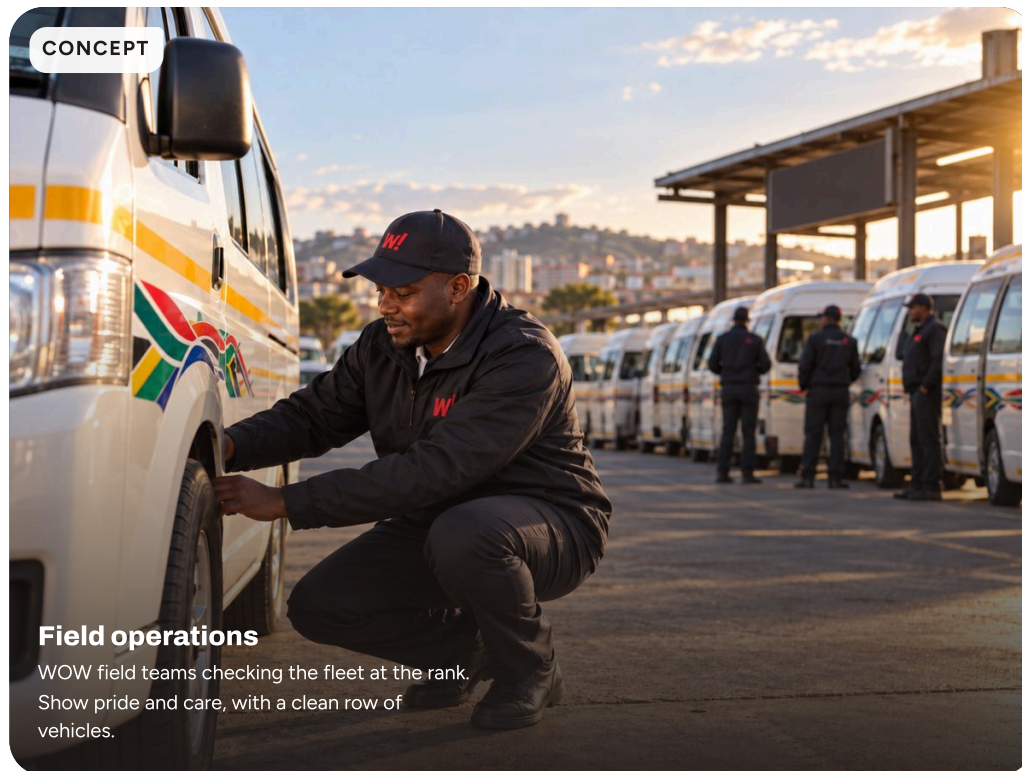

CONCEPT

Scholars boarding

Learners in uniform board with a palm scan at the door. Real shoots need signed parental consent.

CONCEPT

Field operations

WOW field teams checking the fleet at the rank. Show pride and care, with a clean row of vehicles.

✓ DO

- Shoot on location in the Eastern Cape: Gqeberha, Mthatha, Komani, East London.
- Use natural daylight, rich warm tones and a real sense of movement.
- Get signed model releases for everyone, and parental consent for all minors.
- Leave clear space on one side for a headline and a Tab.

✗ DON'T

- Use generic or overseas stock. AI-generated people are for concepts and internal mock-ups only, never public campaigns.
- Show crowding, conflict, cash in hand or damaged vehicles.
- Use heavy filters, black-and-white or duotones other than Red.
- Show readable number plates or real commuters' phone screens.

Arrive with intent

WOW speaks like a proud owner addressing their own people: direct, warm, confident and never corporate. We write for someone reading on a basic phone at a busy rank.

Speak as the owner

The industry built this. Say “your co-op” and “we”, never “the beneficiaries”.

✓ SAY

“Your co-op. Your rules. Every rebate flows back to you.”

✗ NOT

~~“This initiative empowers informal-sector stakeholders to access benefits.”~~

Say it at rank level

Use short sentences and everyday words. If a driver can’t repeat it to a passenger, rewrite it.

✓ SAY

“Data that doesn’t expire. Buy what you need, when you can.”

✗ NOT

~~“Leverage our non-expiring MVNO data bundles for optimised connectivity.”~~

Confident, not hype

Our proof is scale, ownership and real partners. State facts plainly and let the numbers do the shouting.

✓ SAY

“67 000 operators. One fleet. The fuel you already buy now pays you back.”

✗ NOT

~~“The most revolutionary, game-changing fintech disruption Africa has ever seen!!!”~~

Proudly local

Use South African English, name places the way locals do, and use isiXhosa and isiZulu where it comes naturally. Always add a translation nearby for mixed audiences.

✓ SAY

“Launching in Komani first, then province-wide. Siyabangena!”

✗ NOT

~~“Rolling out to select Tier-2 markets in Q3.”~~

Approved lines

Use these lines exactly as written. New taglines need brand approval.

Siyabangena!

Be WOW!

Your co-op. Your rules.

The industry owns the road ahead.

Fuel. Ride. Pay. Earn. Build.

From rank to revenue.

Crafted and owned by the public transport industry.

Writing style

Follow South African conventions everywhere. The mock-up website mixes several styles, so use this table to fix them.

TOPIC	WRITE	NOT
Brand name	WOW (text) · WOW! (logo only) · Wealth on Wheels	Wow, W.O.W., Wealth On Wheels
Products	WOW Fuel, WOW Mobile, WOW-Fi, WOW-Go, LuckyX by WOW	Wow-Fuel, WOW FI, Wowgo

About the SVGs: they were traced from the 2025 artwork and match the original shapes to within about 1–4%. They're fine for web, social and signage. For print production, still get the designer's original vector files (AI/PDF in CMYK) and a Pantone match for WOW Red, checked on a press proof. PMS 7417 C is the closest starting point.
